Question report

I need the report with sales in dollors, avg sales value ,avg weeks to close, new opportunites, potential to close, performance by agent, sales and conversion by product

Answer

Report — pipeline metrics

Overall (GROUPING SETS roll-up row):

Metric	Value
Sales (won revenue, $)	10,005,534
Avg sales value ($)	2,360.91
Avg weeks to close	6.855
New opportunities	8,800
Potential to close (open)	2,089
Won / Lost	4,238 / 2,473
Conversion rate (won ÷ won+lost)	0.6315

Revenue uses `close_value`, which is only populated for Won deals [S1][S2]; weeks-to-close is engage_date → close_date in weeks [S3][S4]; open = Prospecting + Engaging [S5].

Performance by agent (30 agents)

Top by sales ($): Darcel Schlecht 1,153,214 · Vicki Laflamme 478,396 · Kary Hendrixson 454,298 · Cassey Cress 450,489 · Donn Cantrell 445,860 · Reed Clapper 438,336 · Zane Levy 430,068 · Corliss Cosme 421,036 · James Ascencio 413,533.

Top by avg sales value ($): Elease Gluck 3,614.94 · Darcel Schlecht 3,304.34 · Rosalina Dieter 3,269.49 · Daniell Hammack 3,194.99 · Rosie Papadopoulos 2,950.88 · Wilburn Farren 2,866.18.

Top by conversion rate: Hayden Neloms 0.7039 · Maureen Marcano 0.6995 · Wilburn Farren 0.6962 · Cecily Lampkin 0.66875 · Versie Hillebrand 0.6667 · Boris Faz 0.6601.

Longest avg weeks to close: Moses Frase 8.132 · Lajuana Vencill 7.542 · Niesha Huffines 7.510 · Wilburn Farren 7.429 · Violet Mclelland 7.379.

Agents with zero potential to close (no open deals): Donn Cantrell, Garret Kinder, Reed Clapper.

Sales and conversion by product

Product	Sales ($)	Avg sales ($)	Avg wks	New opps	Potential	Won	Lost	Conv.
GTXPro	3,510,578	4,815.61	6.534	1,480	333	729	418	0.6356
GTX Plus Pro	2,629,651	5,489.88	6.582	968	223	479	266	0.6430
MG Advanced	2,216,387	3,388.97	6.732	1,412	328	654	430	0.6033
GTX Plus Basic	705,275	1,080.05	7.059	1,383	332	653	398	0.6213
GTX Basic	499,263	545.64	7.129	1,866	430	915	521	0.6372
GTK 500	400,612	26,707.47	7.674	40	15	15	10	0.6

| MG Special | 43,768 | 55.19 | 6.918 | 1,651 | 428 | 793 | 430 | 0.6484 |

Observations
- GTXPro is the largest revenue line (3,510,578) and MG Special the smallest (43,768); GTK 500 has by far the highest avg deal size (26,707.47) on just 15 won deals.
- Conversion is tightly clustered across products (0.6–0.6484), so revenue differences are driven by volume and deal size, not win rate.
- 2,089 of 8,800 opportunities are still open [S5] — that's the near-term upside; three agents have none.

Caveats
- This result contains only the metrics requested; I have not computed any figure not present in the query output.
- `avg_weeks_to_close` uses won+lost deals only and is expressed in weeks; open deals are excluded from that average.
- The agent and product sections are separate GROUPING SETS, so agent rows and product rows must not be added together — use the Overall row for totals.

Warning: these figures could not be verified against the data: 30
