Recommendations

• Coach and support agents with win rates below the 63.15% overall, especially Lajuana Vencill (54.98%), Markita Hansen (57.27%), Donn Cantrell (57.45%), Gladys Colclough (58.19%), and Niesha Huffines (60.00%).

• Investigate the 2017-Q4 drop in new opportunities (-57.94% QoQ) and the decline in close-quarter win rate from 82.07% in 2017-Q1 to 60.25% in 2017-Q4.

• Prioritize product conversion: MG Special (64.84% win rate) and GTX Plus Pro (64.30%) have the highest win rates, while GTXPro (63.56%) and GTX Plus Pro also lead recorded won revenue.

• Review MG Advanced, which has 2,216,387 won revenue but a 60.33% win rate, below the overall 63.15%.

• Target high-revenue sectors retail, technolgy, and medical, and high-win-rate sectors marketing, entertainment, and software.

• Expand engagement with top accounts Kan-code, Konex, Condax, Cheers, and Hottechi.

• Address the 333 unpriced open opportunities to improve open-pipeline visibility; the 3,360,822 open-pipeline list price is not probability-weighted.

• Treat GTK 500 win-rate conclusions cautiously because it has only 40 opportunities and 25 closed deals.

• Address the 500 invalid engage dates to improve data quality for future reporting.
